The International Society for Ecological Psychology

Poster Session

October, 1984

Wolpert, L. & Owen, D.H. (The Ohio State University) Flow interferes with descent detection.

Hettinger, L.J. (The Ohio State University) Increasing sensitivity to descent information.

Pallos, I. (The Ohio State University) Are there spirals in the twisted cord illusion?

Gibson, E.J. & The Infant Lab (Cornell University) Surface continuity as a factor in the affordance of traversability.

Todd, J.T. (Brandeis University) Perception of structure from motion without projective correspondence.

Becklen, R. (Sarah Lawrence University) & Stoffregan, T. (Cornell University) Effects of cross-modal specification, redundancy and practice in a dual attention task.

Kay, B. (University of Connecticut & Haskins Laboratories) Rhythmic wrist movements modelled as coupled nonlinear oscillators.

Carello, C. (SUNY-Binghamton) & Turvey, M.T. (University of Connecticut & Haskins Laboratories) An ecological perspective on baseball's "illusions".
